

Further Food and General Waste Tips For Poster 13

Leeds City Council offers advice as to what waste goes in which bin:

Brown Bin: Garden waste including leaves, fallen fruit, grass cuttings, weeds, dead flowers, hedge clippings, twigs and branches. **NOT** food waste, plastic bags, soil & turf or even compostible bags.

Green Bin: Aerosols, mixed paper & card, aluminium foil, plastic bags, food & drink cans, plastic bottles and any plastic containers showing the numbers 1, 2 or 4 in the small triangle, usually found on the base. **NOT** glass bottles/jars, garden or food waste, shredded paper, polystyrene, nappies, batteries or syringes. **Please wash or rinse** all containers before placing in bin. Seek advice for local disposal of glass and syringes.

Black Bin: for all waste that can't be composted or go in your green or brown bins. This is taken to the **Recycling and Energy Recovering Facility** (RERF) where it is incinerated to produce energy that can heat residential or commercial properties.
